Toggle Clamps

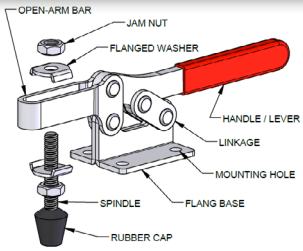

NEW PRODUCT FAMILY

Toggle clamps give the user a quick and simple clamp-and-release feature to hold down a workpiece when conducting repeatable actions. The benefit of these clamps is the high amount of holding capacity with the least amount of effort that is provided by their linkage design.

TYPES OF TOGGLE CLAMPS

HOLD-DOWN HORIZONTAL HANDLE	HOLD-DOWN VERTICAL HANDLE	PUSH-PULL	PULL-ACTION LATCHING
		*highest holding capacity of all the clamp types* 	
has the handle lever at the end of the latch in a horizontal direction when activated	has a vertical handle lever on the top of the latch when activated.	has a plunger that is activated by pushing the handle lever forward. Gives the option of pushing or pulling to hold the workpiece.	includes a wire in the shape of a U-hook or J-hook that latches onto a keeper.

HIGHLIGHTS / FEATURES

- **Quality:** We have a high standard of quality when it comes to our Toggle Clamps. Our latches have gone through extensive quality control checks to make sure they are durable and function at their highest level.
- **Selection:** We offer a great variety of latches for many uses. If you do not find what you need, contact us and let us know. We will be happy to help you find what you are looking for.
- **Safe Use:** It is up to the user to make sure the parts are properly installed and used safely. Make sure to give them proper maintenance and look out for any wear. Clamps may wear out faster when subjected to improper or abusive use.
